DETAILED ACTION

Specification

Applicant should note in the specification the disposition of the parent application.

Claim Rejections - 35 USC § 103

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over PCT in view of either Leach or Takahashi et al. PCT discloses the basic apparatus except for the use of a screen beneath the rollers to ensure complete comminuting of the material. The secondary references solve this problem by disclosing similar apparatus including the use of a screen beneath their rolls. In order to ensure complete comminution, it would have been obvious for one of ordinary skill in the art to modify PCT by providing a screen beneath the rolls, taught to be desirable by both Takahashi et al and Leach.
